Organised by SCI's BioResources and Horticulture Groups

Biorationals – an effective solution to current and future crop protection problems?

Wednesday 1 October 2014, SCI, London, UK

Synopsis

With contributions from a number of international experts the conference will introduce new approaches to the commercially viable and environmentally friendly use of biorationals in crop production – but much more than a list of new products.

Biorationals already offer considerable opportunities when they are used alone on protected crops and in organic crop production. There is however a much greater potential for their use as components of integrated control systems often in combination with conventional chemical crop protection agents.

The BioResources Group of SCI has established an unsurpassed reputation in bringing forward the benefits of science to industry and providing communication platforms for important changes in policies and practical applications. This conference expects to set a benchmark for the future of crop protection.

Attendees

With notable speakers from North America and Europe the conference will be of particular value for those delegates involved in research and development related to crop protection, environmental issues and regulatory policies. It will be of benefit to both national and international delegates working with public and private sector organisations as well as independent consultants and communication specialists.

Supported by Enterprise Europe Network and Crop Protection Monthly

Posters

A poster competition will take place. Interested delegates are strongly encouraged to submit their application for this early, as numbers will be limited. Please send a one-page abstract to conferences@soci.org by **Friday 1 August 2014**. SCI's publishing partner Wiley is generously sponsoring prizes for posters at this event.

Registration

Early bird rate before 1 September 2014

SCI Member - £80, Student Member - £40, Non-Member - £115
Subsidised member - £50

Standard rate after 1 September 2014

SCI Member - £95, Student Member - £50, Non-Member - £135
Subsidised member - £60

BASIS points have been applied for.
