

SCI's peer-reviewed journals provide commentary articles and research studies undertaken by top scientists in emerging areas whilst addressing global audiences by crossing academic, industrial, government and science policy sectors. The journals are published by Wiley on behalf of SCI.

Biofuels, Bioproducts and Biorefining

Biofpr is the definitive source of information on sustainable products, fuels and energy. Examining the full scope of international scientific research and industrial development along the entire supply chain, it comprises two parts, a website and a scientific review journal.

Energy Science & Engineering

Energy Science & Engineering is a new peer-reviewed, open access journal dedicated to fundamental and applied research on energy supply and use. It offers a fast route to publication and the opportunity to publish in a broadly distributed and highly visible global forum. SCI members receive a 20% discount on articles published in this journal.

Greenhouse Gases: Science and Technology

Greenhouse Gases: Science and Technology provides an important resource exploring the methods for capture, storage, transportation and utilisation of carbon dioxide and other greenhouse gases. The journal also offers analyses of relevant economic and political issues, business and industry developments, case studies and features.

WILEY

SCI

where science meets business

Journal of Chemical Technology and Biotechnology

The Journal of Chemical Technology and Biotechnology is an international peer-reviewed journal concerned with the application of scientific discoveries and advancements in chemical and biological technology that aim towards economically sustainable industrial production or are necessary for environmental protection. JCTB focuses on the interfaces between chemical technology and biotechnology, especially where these impact on health and safety and the environment. The journal features reviews, research articles, and technical notes.

Journal of the Science of Food and Agriculture

The Journal of the Science of Food and Agriculture publishes peer-reviewed original research and critical reviews in these areas, with particular emphasis on interdisciplinary studies at the agriculture/food interface. This international journal covers fundamental and applied research. SCI members receive a 20% discount on articles published in this journal.

Pest Management Science

Pest Management Science is an international, peer-reviewed journal of research and technology on crop protection and pest control. Since its launch in 1970, the journal has become the premier forum for papers covering all aspects of research and development, application, use and impact on the environment of products designed for pest control and crop protection.

Polymer International

Polymer International publishes on new developments in all branches of macromolecular science and technology. The journal covers original research on biopolymers, polymer chemistry, polymer physics and industrial polymer science.
